## **Companies Represented**

### **John Zink Company** - [www.johnzink.com](http://www.johnzink.com)

Global leader in advanced Environmental Control Equipment for industrial applications, specializing in state-of-the-art Low NOx Burners, Flares, Biogas Flares, and Thermal Oxidizers.

### **Innovative Equipment Solutions** - [www.neptunewash.com](http://www.neptunewash.com)

Automated Wheel Wash Systems designed to meet the growing demand in the landfill and mining industries for robust, reliable, and easy-to-maintain solutions.

### **Elkins Earthworks-Landfill Gas Analyzer** - [www.elkinsearthworks.com](http://www.elkinsearthworks.com)

The newest landfill gas analyzers on the market, the MESA handheld unit delivers unmatched reliability in a portable, user-friendly design.

### **Qnergy – Methane Powered Remote Solutions** - [www.qnergy.com](http://www.qnergy.com)

Remote power and compressed air solutions driven by Free Piston Stirling Engine technology, a proven system powered by the most reliable heat engine, with virtually no moving parts.

### **Blackhawk Technology Company** - [www.blackhawkco.com](http://www.blackhawkco.com)

Positive displacement pumps for landfill gas well dewatering, leachate pumping, product recovery, groundwater management, and other environmental applications, powered by pneumatic, solar, or electric drivers.

### **Honeywell – Flame Monitoring** - [www.ryanequipment.com/shop](http://www.ryanequipment.com/shop)

Factory-authorized distributor of the Industrial Flame Monitoring line. With multiple models available (IR and UV Tron) for application flexibility, every unit features an electronic self-check system, eliminating the need for mechanical shutters.

### **Concrete Canvas** - [www.concretecanvas.us](http://www.concretecanvas.us)

For all your erosion control and containment needs, Concrete Canvas is a flexible, concrete filled geosynthetic that, when hydrated, forms a thin, durable, and rapidly installed concrete layer.

### **Thermal Instrument Company** - [www.thermalinstrument.com](http://www.thermalinstrument.com)

Design, manufacturing, and calibration of thermal mass flow meters and flow switches for precise liquid and gas measurement. Industries include pollution control, landfills, GHG emissions, chemical processing, and power & utility.

### **APIS Innovation** – [www.apisinnovation.com](http://www.apisinnovation.com)

Offers a device for complete landfill gas well control in a single, self-contained, solar-powered, and wireless unit, which delivers precision tuning with minimal intervention
